## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-3 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12 and 13 of U.S. Patent No. 6,618,866. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1 -3 of the present invention show a vacuum tank assembly with a dip tube assembly which is similar to that of claims 1, 6, 10-13 of U.S. Patent No. 6,618,866.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Friedman et al (5,621,924).

The Friedman et al reference discloses a vacuum tank assembly comprising a vacuum tank 13; a dip tube assembly 38 mounted in a first opening 19 in a position, such that sewage in

the tank may be readily withdrawn, adjacent the bottom surface of the tank, and constructed to readily connect to a vacuum pump 14; wherein the dip tube assembly 38 comprises an adaptor 39 and an evacuator component 44, the adaptor connecting the evacuator component to a the vacuum pump 14, the evacuator component comprising a tubular evacuation portion having a substantially flat open bottom 46 closely overlying the tank bottom surface in the tank interior as shown in Figure 2.

### **Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Terve and Friedman et al '148 references show a vacuum tank assembly comprising a dip tube assembly.
